

## Marine Active Complex

### Introduction

This product was originally developed to use as an anti-aging, overnight treatment, however, it has been so popular, and well received that my customers use it in the morning under moisturiser and make-up (it makes for a great make-up base!) Put very simply, it is a facial oil/serum which is food for the skin! I also make a version for men called Beard and Bare Skin Gear with a more masculine scent.

### Skin Type

Developed as an anti-aging product but customers with all skin-types have found it beneficial.

### Ingredients and benefits

The following describes a few of the ingredients: -

**Argan Oil** produces prostaglandins and increases hydration, **Calendula Oil** promotes skin suppleness, **Rosehip Oil** smooths fine lines and wrinkles and improves elasticity. **Pumpkin Seed Oil** is High in Zinc and omega 3, 6 and 9 and has a lifting effect on the skin. **Borage Oil** has a high GLA content (Gamma Linoleic Acid is used by the body to produce prostaglandins). **Vitamin E** is highly anti-oxidant, protecting against free radicals and the destruction of the connective tissue. **Pomegranate Seed Extract** Strengthens cell membranes, regulating cell turnover and prevents water loss from the cells. **Arctic Cranberry Extract** nourishes, moisturises and protects the skin. **Eco Marine Extract** has been proven to increase cell proliferation, increasing collagen synthesis by 19.3% in just 24 hours. It promotes healing, strengthens the skin and restores suppleness and radiance.

### How to use it

Apply one pump in the morning under moisturiser to the face and neck. Two pumps can be used as a night treatment. Marine Active Complex can also be used as a hair conditioner, or scrunch treatment. Some of my customers add a couple of pumps to their body lotion.
