

Sensitive Facial Toner

Introduction

Toners are often neglected but they are a very important part of your skincare regime. They are designed to remove any last traces of dirt or product, close the pores and bring the skin back to a healthy PH level to maintain the acid barrier, enabling your skin to protect itself. The ingredients in this product have been chosen because they are unlikely to cause a sensitive reaction. Sensitive Toner does not strip the skin of sebum and contains no alcohol.

Skin Type

Sensitive, fragile and irritated skin.

Ingredients and benefits

Sensitive Facial Toner contains Aloe Vera, Panthenol, and a blend of Chamomile, Lavender and Neroli Essential Oils. The product has soothing, regenerating and calming properties and Neroli Oil helps to reduce redness.

How to use it

Apply 2 – 3 pumps to dry cotton pads and apply to the skin in upward movements.
