

Tea Tree Rescue Lotion

Introduction

This product was designed as an after wax treatment, aiming to reduce in-growing hair! However, it has turned out to have a lot of uses. It's great for after waxing, taking the redness down almost immediately and it feels so soothing. It works well as an after shave, after sun and soothing lotion. If you are a waxing professional, you will find that people really want this product after waxing!

Skin Type

All skin types

Ingredients and benefits

Sweet Almond Oil and Shea butter maintain the skin's suppleness and ensure that moisture is retained. Glycerine aids the retention of moisture and Lactic Acid has an effect like AHA reducing the likelihood of ingrowing hair. The essential oil blend contains Tea Tree, Eucalyptus and Lemon, giving the product anti-bacterial, anti-viral, anti-fungal and anti-septic qualities (and it smells so fresh!)

How to use it

Apply to skin as required.
